# Growth and utilization of Shodhganga

Ellora Barman. PhD research scholar Dr S . Ravikumar Associate professor Bidyut. B . Borah. PhD research Scholar

North Eastern Hill University (NEHU), Shillong, Meghalaya.

### What is ETD ?

#### It's a digital version of a thesis or dissertation (ETD). Submitted and stored electronically rather than in print.

### Shodhganga

a reservoir of Indian theses

- It is a digital repository of theses and dissertations submitted to universities in India.
- Launced 2009, managed by INFLIBNET.
- It provides plateform for students to deposit their Ph.D. theses and make them available to the entire scholarly community in open access.

### Objective

- To know the shodhganga uses pattern since its inception .
- To know what are the regions involved worldwide and within India
- To know yearly update of theses and dissertations .
- Text analysis of the titles to understand the growth of topics , topic modelling of the documents ,publication proportion of the topics .

### Significance -

- Academic advancement and collaboration
- Global reach and impact
- Digital transformation research
- Efficient information retrieval
- Plagiarism detection through shodhsudhi
- Contribution to academic literature
- Future research and development .

#### Scope

- Usage pattern analysis
- Global and regional engagement
- Yearly update trends
- Text analysis and topic modelling
- Implication for research and education
- Technological advancement
- Future research avenue
- Policy implications

### Methodology

- Google trends for shodhganga uses patterns , local and global use and related topic and queries.
- For text analysis LDA method of text mining is used.

### To know shodhganga uses uses pattern since its inception

### To know what are the regions involved worldwide and within India

### Regional interest

Interest by subregion 🧿

		Subregion 🔻	₹	<>	Ś
1	Sikkim	100	Ĩ		
2	Nagaland	73			
3	Arunachal Pradesh	71			
4	Kerala	68			
5	Puducherry	64			
		e e e s			

## To know yearly update of theses and dissertations

### Number of topics

### Topic Modelling of the documents

### Topic modelling of the documents

### Publication proportion of topics from 2010 to

2023

year

drug effect cancer rat induc novel select adhyayan critic fiction bank refer sector industri special character product rice molecular plant india librari inform univers technolog student school secondari effect teacher model system design base techniqu synthesi character metal compound applic tamil nadu district india pradesh district refer special women rural

### Discussions about the findings -

- Useage pattern and online research .
- Global and regional engagement.
- Digital transformation and updating trends
- Thematic evolution and topic modelling
- Research focus and emerging topics .
- Academic collaboration and plagiarism detection .
- Educational policy and digital literacy .
- Future research and technological integration .

### Conclusion-

Limitation-heavy reliance on google trends , technological advancement in text mining beyond those utilized might impact accuracy of the study .

Conclusion-text mining by identifying significant topics this study aids researcher navigating the repository content efficiently and extracting meaningfull insights . As the shodhganga grows it has potential to be the central repository for Indian research . Global collaboration and interdisciplinary research are the areas it sheds light on .
